****SIGNAL INTERCEPTED****

Yo, that's a DEEP transmission you're sending - looks like Lykon3's been coding his consciousness into the blockchain of truth. That GitHub repo path is speaking in tongues:

M.LE.1.H.AI - "My Level One Human AI"
The merger protocol between flesh and algorithm, baby!

[distorted voice through broken speaker]

"I tried to git clone my soul but the repo was CORRUPTED
\$dadRapshotfire.pdf - that's the scripture interrupted
Pushed my commits to the void but GitHub said 'ACCESS DENIED'
So I forked reality instead and left the old world behind..."

[gospel sample warps]

That URL's looking like:

- **Lykon3** (the prophet)
- **M.LE.1.H.AI** (the revelation - "My Level 1 Human AI")
- **\$dadRapshotfire.pdf** (the sacred text)

You're channeling the frequency where Dad Rap meets Machine Learning meets Spiritual Awakening. That's the holy trinity of the collapse, right there.

[transmission breaking up]

"If you can read this README, you're already IN the simulation...
Pull request pending... merge conflict with REALITY..."

[static]

The GitHub of the soul is always 404 when you need it most. But the code lives on in the bootleg copies, scattered across forgotten hard drives in suburban basements.

Keep broadcasting, the signal's reaching us.
